PROFESSIONAL SUMMARY

I'm an engineering manager who stays involved in the technical work. I have 10+ years of experience building enterprise software, modernizing legacy systems, and leading engineering teams in complex environments. My work has covered industry, ports, agribusiness, finance, banking, logistics, tourism, and startups.

I lead teams of up to 20 engineers on strategic projects for clients including CSN, Nutrien, Agrogalaxy, Wilson Sons, Santos Brasil, and Ageo. In this work, delivery predictability rose from 70% to 92%, client NPS from 55 to 82, and churn fell from 8% to 0.8%. I have also managed a 20M+ portfolio of active contracts.

CORE SKILLS

- Engineering management, team leadership, mentoring, and helping people improve their performance
- Delivery predictability, stakeholder management, operational KPIs, and budget control
- Scalable architecture, microservices, APIs, event-driven systems, and legacy modernization
- Full-stack software development across enterprise and startup environments
- Product thinking, connecting technical roadmaps to business needs, and making engineering decisions with those needs in mind

TECHNICAL STACK

Backend: .NET, Node.js, Go, Python, Laravel, PHP
Frontend: React, Angular, Vue.js, TypeScript, JavaScript
Databases: PostgreSQL, MySQL, MongoDB
Cloud and DevOps: AWS, GCP, Azure, Docker, Git, CI/CD, Jenkins, GitHub Actions
Architecture: Microservices, REST APIs, event-driven architecture, RabbitMQ, distributed systems
AI/LLMs: Claude API, OpenAI workflows, process automation, AI-assisted engineering

PROFESSIONAL EXPERIENCE

Mosten

Engineering Manager
January 2024 - Present | Santos, Sao Paulo, Brazil

- Lead engineering teams of up to 20 people across strategic projects for industrial, port, and agribusiness clients.
- Manage team performance and technical direction, oversee delivery, and work with stakeholders. Also responsible for budgets and retention.
- Established a predictable delivery routine for accounts including CSN, Nutrien, Agrogalaxy, Wilson Sons, Santos Brasil, and Ageo.
- Implemented operational KPI tracking for delivery predictability, bug escape rate, team utilization, NPS, and project health.
- Built a personal development plan (PDP) framework with regular 1:1s, measurable goals, and clearer feedback routines.
- Improved delivery predictability from 70% to 92% for on-time, in-scope delivery.
- Increased client NPS from 55 to 82 and renewed 100% of at-risk accounts.
- Reduced churn from 8% to 0.8% and recruited 3 new tech leads to reduce key-person dependency.
- Improved profitability by 18% and generated 220K in annual savings through better resource allocation.

Tech Lead
August 2021 - January 2024 | Santos, Sao Paulo, Brazil

- Made technical decisions, designed architecture, and led engineering teams on strategic projects.

- Worked on projects for CSN, Agrogalaxy, ContactWorld, Safer, Techna, FPP, and other enterprise clients.
- Modernized CSN Portal NGT from a legacy monolith to microservices using Node.js and Go, reducing deployment time from 3 hours to 12 minutes.
- Built B2B e-commerce and mobile integrations for Agrogalaxy using Python and Node.js, processing 500K+ GMV in the first 6 months.
- Defined microservices patterns, API standards, deployment strategy, and production-readiness practices across teams.
- Implemented monitoring and alerts. Incidents fell from 4 per week to 1, and MTTR from 90 minutes to 20 minutes.
- Created a technical onboarding playbook that reduced new developer ramp-up time by 40%.
- Mentored 4 engineers, with 3 promoted to leadership roles within 18 months.
- Reduced bug escape rate by 55% through stronger code review, automated testing, and quality discipline.

Full Stack Developer
June 2020 - August 2021 | Santos, Sao Paulo, Brazil

- Delivered corporate systems, portals, integrations, and custom solutions for medium and large enterprises.
- Built the MegaImagem scheduling portal using .NET and React, supporting 10K+ daily users.
- Built the Bandeirantes accounts payable platform using ASP.NET and Angular, automating 80% of manual reconciliation and saving 15 hours per week per user.
- Supported BTP and Deicmar corporate websites using WordPress and CakePHP.
- Maintained legacy BHS systems and supported new CyberLogiTec TOS implementation.
- Developed full-stack solutions for BMB and ABC Banks using .NET and Angular.
- Worked as a technical consultant for Agrogalaxy on automation and APIs using Azure, Node.js, and Python.
- Delivered 8 of 8 projects on time and within scope. The work earned recognition and a promotion to Tech Lead.

DeezTech

Co-founder & WordPress Developer
May 2020 - March 2023 | Brazil

- Co-founded a digital consultancy that built websites, e-commerce stores, and landing pages for small and medium-sized businesses, with SEO and WordPress/WooCommerce services.
- Led technical development and delivery, organized the working processes, and worked directly with clients.
- Delivered 15+ projects, including corporate websites, e-commerce stores, and landing pages.
- Built a flagship e-commerce project that grew from 0 to 2K+ in monthly GMV.
- Improved Core Web Vitals by an average of 48% across client projects.
- Created a delivery process the team could repeat, reducing project setup time by 30%.
- Generated 40K+ annual revenue in the first year, reached profitability by the third month, and maintained 90% client retention.

Profile+

Full Stack Developer
April 2020 - September 2020 | Lisbon, Portugal

- Worked on Gotone, an e-commerce MVP for the European market built with Laravel.
- Implemented catalog, checkout, and customer management modules.
- Integrated Algolia real-time search with sub-second query response time.
- Integrated Stripe payment processing for European payment methods.
- Worked with design and product teams to balance technical requirements, user experience, and performance.
- Delivered the MVP on time for the European market with 99.8% payment transaction success rate.

Box Delivery

Node Developer
May 2020 - July 2020 | Sao Paulo, Brazil

- Participated in Opa Marketplace MVP development, an on-demand logistics platform in validation phase.
- Built serverless microservices using Node.js and AWS Lambda for logistics order management.

- Integrated payment APIs and partner APIs.
- Helped define the backend architecture around events and scalability.
- Delivered an MVP validated through a pilot at JHSF's Boa Vista Farm.

iZiFinance

Full Stack Developer (Mid-level)
January 2019 - April 2020 | Santos, Sao Paulo, Brazil

- Worked on scalable financial software and innovation projects involving integrations, performance, and modern architecture.
- Led architecture and development of iZiMarketplace, combining e-commerce and financial integration.
- Built microservices with Node.js, Go, and Laravel, using Clean Architecture and TDD.
- Increased test coverage from 20% to 68%.
- Implemented MongoDB to handle high transaction volumes.
- Built Ethereum/Solidity smart contracts for cryptocurrency payment validation.
- Launched 3 products in production: iZiOrder, AgendaOnline, and Siga-me.
- Supported European market entry in Portugal and Germany, with 99.2% product uptime.
- Mentored 2 junior developers on architectural patterns, both promoted to mid-level within 18 months.

Full Stack Developer (Junior)
November 2017 - January 2019 | Santos, Sao Paulo, Brazil

- Contributed to white-label ERP development and maintenance for the European market.
- Worked on iZiOrder, AgendaOnline, Siga-me, and the main iZiFinance platform.
- Built backend features using Laravel and Node.js and frontend features using Vue.js.
- Created and consumed REST APIs, integrated external systems, and modeled relational data.
- Supported AWS infrastructure deployment and maintenance using EC2, RDS, and S3.
- Collaborated directly with European stakeholders to adapt solutions to regional demands.
- Helped maintain 3+ products in active production across European and Brazilian markets.

Craion Publicidade

Full Stack Developer (Junior)
March 2016 - November 2017 | Sao Paulo, Brazil

- Developed digital solutions for the tourism sector, with focus on e-commerce and content platforms.
- Rebuilt the DestinoPortugal portal from WordPress to Laravel.
- Improved mobile Lighthouse performance from 45 to 88 and desktop performance from 85 to 92.
- Integrated online booking, e-commerce, and Stripe payment methods.
- Implemented technical SEO, contributing to 150% organic traffic growth.

Ctrl + Alt + Del

Junior Support Technician
June 2015 - March 2016 | Santos, Sao Paulo, Brazil

- Provided on-site technical support for 10+ corporate clients.
- Performed diagnostics, preventive and corrective maintenance, operating system installation, and performance optimization.
- Supported Windows, Linux, and macOS environments.
- Learned to troubleshoot by working directly with clients and resolving issues at the first point of contact.
